Liberty® Herbicide Weed Control Guarantee

Liberty herbicide is proven to effectively control even the toughest weeds, both grasses and broadleaf weeds. We are so confident in its weed control that BASF stands behind its performance with the 2019 Liberty Herbicide Weed Control Guarantee (see reverse for details).

- Designed for all LibertyLink® crops – canola, corn, cotton and soybeans
- Broad spectrum control of broadleaf weeds and grasses
- Excellent for management of key weeds like palmer amaranth, waterhemp, kochia, ragweed and marestail including those that have become resistant to other herbicides
- The active ingredient in Liberty herbicide is the only herbicide that effectively controls grasses and broadleaves with no known resistance in U.S. broadacre crops
- Application flexibility and fewer restrictions make Liberty herbicide more convenient to use
- Superior weed control performance than other generic glufosinate products through its unique, patented formulation
2019 Liberty® Herbicide Weed Control Guarantee

When you apply Liberty herbicide according to label instructions and follow the below S.T.O.P. application guidelines, we are confident it will meet commercially acceptable control. If commercially acceptable control isn’t met, talk to your retailer or BASF representative for re-spray assistance on the affected acres.

S.T.O.P. Application Guidelines

**Start clean and stay clean**

Start with a clean field prior to planting

Control weeds prior to planting with an effective burndown herbicide or tillage to start with a clean field.

**Target < 3" weeds**

Apply Liberty herbicide to emerged weed <3"

Liberty herbicide is a contact herbicide that will control emerged weeds. Weeds larger than 3” or not emerged at the time of application are not covered in the guarantee.

**Optimize coverage**

Rate: Minimum of 32 oz/A*

Water: 15 to 20 GPA*

AMS: 1.5 lb/A to 3.0 lb/A*

Nozzle: Medium-to-coarse droplet size

**Pair with residuals**

Pair with pre-residual herbicide with 2 effective modes of action (i.e. Zidua® Pro herbicide, Verdict® herbicide) and we recommend a post-residual applied herbicide (i.e. Outlook® herbicide, Zidua herbicide) in the tank with Liberty herbicide.* Apply at labeled rates.

*For geographic or crop specific rate, water volume, AMS rate, and qualifying residual products ask your local retailer or BASF representative.

Not following the above S.T.O.P. application guidelines will result in non-qualification for the 2019 Liberty Herbicide Weed Control Guarantee. For maximum financial incentive pair with BASF residual products. Consult your BASF authorized retailer to learn more about the 2019 Liberty Weed Control Guarantee details and requirements.

**Details**

- An authorized BASF representative must be notified of a Liberty Herbicide Weed Control Guarantee claim within 10 days of application, by July 15, 2019, and have a reasonable opportunity to inspect the sprayed area prior to making any rescue applications. The authorized BASF representative must confirm inadequate control relative to commercially acceptable control. Commercially acceptable control is defined at 90% level control of emerged weeds at time of application.
- Only product purchased from a BASF authorized retailer or BASF distributor is eligible.
- Weeds larger than 3 inches or not present in the field at the time of Liberty herbicide application do not qualify for the guarantee.
- Post residual herbicide is recommended with Liberty herbicide but not required for Guarantee qualification. Cotton requires 1 pre-residual MOA and canola requires no pre-residual MOA.
- Pre-emergence burndown is not covered.
- All payments are subject to final approval by BASF. BASF reserves the right to audit all claims. BASF reserves the right to change any or all features of the Liberty Herbicide Weed Control Guarantee. Payments provide assistance towards a respray.
- Always read and follow label instructions. No results are guaranteed. Submission of a claim under this program precludes Grower from submitting a claim from any BASF product claims process or claims program with respect to the affected acres.
